The authors would like to draw the reader’s attention to an error in the article that the correct number of residents excluded from the target was 71.

The correct sentence in the Result section of the main text is as follows:

We targeted 234 village residents after excluding 71 who met the exclusion criteria; thus, a total of 168 participants completed the surveys (response rate 72%).

The Figure 1 should be corrected as follows:

The authors would like to apologize for the error and any confusion it may have caused.
